There are few annual flowers grown in the garden more valuable for cut flower work than the Arctotis. It is easily grown from seed and may be started in hotbed, in the house, or in the open ground, the seed germinating in about five days, and the plants may be expected to come into bloom early in July and continue until quite hard frost. It delights in a sunny situation. As a cut flower it is

Candytuft (*Iberis Umbellata*)

All authorities agree on the great decorative value of this charming annual for beds, borders, etc., and the larger the mass the better the effect. The plants grow about 12 inches high and will succeed in any light, airy position. Seed may be sown any time during the spring. They bloom in about eight weeks from the time of sowing, and in order to keep up a succession of bloom two sowings should be made at intervals of about two weeks. For best results give each plant sufficient space for full development, not less than six inches apart and nine inches is better. While highly useful for cutting, lasting well, and used extensively for this purpose by many commercial florists, it is for their bright effect in the garden that they are mainly grown.

- 1751 **Carmine.** Bright carmine rose.
 - 1752 **Crimson.** Rich deep shade.
 - 1755 **Albida.** Pure white.
 - 1756 **Flesh Pink.** Delicate pink.

GIANT DOUBLE CARNATION

Double-flowering Cosmos

It has taken a great deal of care and patience to perfect this strain. The flowers vary considerably in their degree of doubleness, some being absolutely double, while others have a frill or collar surrounding the double disc, and while we think this is the most artistic, they are beautiful in either form, of high value for cutting and garden decoration. We offer both the Early and Late flowering strain, for points north of Philadelphia, the early flowering is best.

DREER'S DE LUXE HYBRID DELPHINIUMS

Dreer's De Luxe Hybrid Delphiniums

Produced from the world's choicest named varieties, secured without regard to cost from the most noted European and American specialists. EARLY FLOWERING DOUBLE COSMOS

Collection of 12 Extra Choice Hardy Perennials

3550 Nothing finer than this collection could be selected. A packet each of 12 varieties for \$1.00.

DIANTHUS OR PINKS

A magnificent genus, embracing some of the most popular flowers in cultivation, producing a great variety of brilliant colors and profusion of bloom. The varieties classed as annuals are really biennials, but are treated as annuals and may be sown out of doors when the danger from frost is past, and in a few weeks time they are a mass of bloom, continuing so until after hard frost. As a rule, they survive the winter if given slight protection flowering abundantly the following season. They grow about a foot high, and can be used in beds or borders of solid or mixed colors. The double flowering sorts are almost as fine as carnations for cutting. They are not particular as to soil, but should have a sunny location.

DREER'S WONDER BUSH LIMA BEANS

Dreer's Matchless Brussels Sprouts

183 A selected strain of this highly esteemed, hardy vegetable, grown for the sprouts which are produced along the stem, and are in the form of miniature savoys. The small spoon-shaped leaves wrap around one another and form solid round heads in large quantities, and which are tender and of fine flavor. The heads begin to form at bottom of stem, and when cut away additional heads will form in succession up to the top of stem. Pkt., 10 cts.; $\frac{1}{2}$ oz., 20 cts.; oz., 35 cts.; $\frac{1}{4}$ lb., \$1.00.

Golden Acre Cabbage

204 This excellent new variety is the earliest round headed Cabbage. It will mature at least 7 days ahead of the earliest strains of Jersey Wakefield, considered the standard Early of the country. The heads of Golden Acre cabbage are perfectly round, firm, and of exceptionally fine texture, heavy mid-ribs being entirely absent. They average in weight about 4 pounds and produce very few outer leaves, permitting close planting in the row. A valuable addition to the list of fine Cabbages. Pkt., 20 cts.; $\frac{1}{2}$ oz., 80 cts.; oz., \$1.50; $\frac{1}{4}$ lb., \$4.00.

Improved Rubicon Carrot

242 This beautiful half-long stump-root Carrot is about the same length as the well-known Danvers, but is cylindrical, and is rich dark orange in color, very sweet and mild. Remarkably clean-skinned, grows evenly and is easily pulled. Grows best in a soft, deep and mellow soil, which has been well manured. Pkt., 10 cts.; oz., 20 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.50.

Dwarf Golden Carmine Wax Beans

Ready for the table as a snap bean in about 60 days, and as a shell bean about 10 days later. At all stages the pod is stringless and tender. Pods are large, broad, long and golden-yellow, splashed with carmine, and seed is large kidney-shaped, buff colored, and mottled. Pkt., 10 cts.; $\frac{1}{2}$ lb., 25 cts.; lb., 45 cts.; 2 lbs., 85 cts.; 5 lbs., \$2.00, prepaid.

Dreer's Wonder Bush Lima

111 Very desirable on account of earliness, productiveness and its fixed habit of growing in the dwarf or bush form. The plants are of strong, upright growth, and are completely covered with large pods, many of which contain four beans fully as large as those of the pole limas. The beans are flat and broad and are superior in flavor to the round, thick-seeded varieties. On account of its unusual earliness, Wonder Bush Lima can be planted well on in the season without much risk of failure. Pkt., 15 cts.; $\frac{1}{4}$ lb., 25 cts.; lb., 45 cts.; 2 lbs., 85 cts.; 5 lbs., \$2.00, prepaid.

Pkt., 10 cts.; oz., 25 cts.; $\frac{1}{4}$ lb., 75 cts.; lb., \$2.00.

EARLY WONDER BEET

Dry-Weather Cauliflower

- 256 A fine variety of Cauliflower, especially adapted for growing in the open ground in sections subjected to long, dry seasons, as it will grow well and produce the finest heads in spite of the lack of moisture, which is required by other sorts. The heads grow to a large size, are very solid, pure white and of delicious flavor. It is not suited for forcing or growing under glass, but it will prove valuable in the Southern States, where the climate is hot and where long seasons of dry weather are experienced. One of the safest sorts for the amateur to grow. Pkt., 25 cts.; $\frac{1}{4}$ oz., \$1.75; $\frac{1}{2}$ oz., \$3.00; oz., \$5.50.

Pkt., 25 cts.; $\frac{1}{4}$ oz., \$1.75; $\frac{1}{2}$ oz., \$3.00; oz., \$5.50.

EMPEROR CELERY

Dreer's Extra Early Sugar Corn "Independence"

- 327 The chief objections to most of the extra earlies have been that high quality has been lacking and the ear too small and too loosely covered. These drawbacks we have now overcome, and we now offer this delicious corn which will produce ears equal in quality to the best of the later maturing sorts. On stalks averaging $3\frac{1}{2}$ feet high, 2 and sometimes 3 large ears are produced. These ears are 6 to 7 inches long, with 10 or 12 rows of plump, milky grains of surprising sweetness. At our trials in New Jersey this corn was ready in 60 days from the date of planting and is a week or ten days earlier than White Cory, which has up to now been the best quality corn among the white extra earlies. The dwarf growth of the stalk makes it very desirable for growing in the garden of limited size. Pkt., 15 cts.; $\frac{1}{2}$ lb., 30 cts.; lb., 55 cts.; 2 lbs., \$1.00; 5 lbs., \$2.25, prepaid.

Golden Sunshine Sugar Corn

- 322 This valuable variety was developed and introduced by Dr. Yeager of the North Dakota Agricultural Experiment Station and has instantly sprung into popular favor. Of a rich golden color the ears are about one inch longer than Bantam, and have 12 rows instead of 8, while quality is fully equal to the latter sort. Most important, however, is the exceptional earliness of Golden Sunshine, for it is actually from 7 to 10 days earlier than Bantam. Originators stock. Pkt., 15 cts.; $\frac{1}{2}$ lb., 30 cts.; lb., 55 cts.; 2 lbs., \$1.00; 5 lbs., \$2.25, prepaid.

Klondike Cucumber

- 382 Of rich dark green color, fully developed specimens rival greenhouse grown fruits in beauty and symmetry. Average specimens are 6 to 7 inches long by $2\frac{1}{2}$ inches in diameter. Reaches this size within 55 to 60 days and the exceedingly vigorous vines continue bearing during a long season. Equally useful for pickles or slicing, Klondike may be termed a good "allround" cucumber for home and market garden alike. Pkt., 10 cts.; oz., 20 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., \$1.50.

GOLDEN SUNSHINE SUGAR CORN

Dreer's "Wonderful" Lettuce

(See illustration of a typical head alongside.)

483 Sometimes called "New York" or "Los Angeles Market." An extremely desirable variety, for all sections since it withstands extreme heat and forms perfect heads, of enormous size, which resemble cabbage in their solidity, measuring from 12 to 15 inches across and frequently weighing 2 to 3 pounds each. The outer leaves tightly overlap, and are rich, dark green in color, while the heart blanches up beautifully, and the quality is superb, being crisp, rich and tender. This is the Lettuce which is grown so largely around Los Angeles and shipped East, where it is eagerly sought by those who appreciate the best quality. It will produce splendid heads either when planted in the spring, or during the summer and may be depended upon for all seasons. This splendid Lettuce must not be confused with "Iceberg," offered on page 29, the outer leaves of which are tinged with brown. Pkt., 10 cts.; $\frac{1}{2}$ oz., 20 cts.; oz., 35 cts.; $\frac{1}{4}$ lb., \$1.00.

DREER'S "WONDERFUL" LETTUCE

Dreer's Prizetaker Leek

438 This is a very fine variety, growing to a medium height, but with the thick stalk averaging 6 inches, almost entirely covered with soil, making it self blanching. Specimen stalks of our Prizetaker have reached 3 inches in diameter, and it is in demand for growing for exhibition. Can be stored in a cool cellar quite safely. Pkt., 10 cts.; $\frac{1}{2}$ oz., 20 cts.; oz., 30 cts.; $\frac{1}{4}$ lb., \$1.00.

Hale's Best Muskmelon

510 This is the Melon now grown so extensively in the Imperial Valley, Cal., for early shipment to the big Eastern markets. On account of its remarkable earliness and fine shipping qualities it has now superseded the old time Rocky Ford. Hale's Best is slightly larger and 2 weeks earlier than the standard Rocky Ford, and is pink fleshed clear to the rind, which is well ribbed and netted. The flesh is very thick, with only a small seed cavity and of excellent quality, being sweet and musky. A very prolific Melon and a valuable strain both for the commercial and also the home garden. Pkt., 10 cts.; oz., 25 cts.; $\frac{1}{4}$ lb., 75 cts.; lb., \$2.25.

Delicious Gold Lined Muskmelon

493 Growers of muskmelons, both for home use and for market, will be delighted with "Delicious Gold Lined." The melon is nearly round, without ribs, and the skin is covered with a thick grayish netting, adding much to its appearance. The thick flesh is green, with golden tint next to the small seed cavity, which makes it very attractive when cut, and the flavor delicious, being remarkably sweet and spicy. Vines are very prolific, and bear large numbers of fruits, which are edible in about 90 days from time of planting seed. This melon has our highest recommendation. Pkt., 10 cts.; oz., 30 cts.; $\frac{1}{4}$ lb., 90 cts.; lb., \$3.25.

Gigantic Gibraltar Onion

570 On the order of "Prizetaker," both in shape and size of bulbs. It is of globe shape, with light straw colored skin and white flesh, which is very mild and tender. This variety will produce onions averaging five inches in diameter and weighing up to 2 lbs., if seed is sown early under glass and young plants are transplanted in April. Pkt., 10 cts.; $\frac{1}{2}$ oz., 25 cts.; oz., 35 cts.; $\frac{1}{4}$ lb., \$1.00; lb., \$3.50.

White Portugal Onion

590 Sometimes called Silverskin, this today is one of the most important white varieties, and a standard all over this country and Europe. The bulbs grow flat, pure white, and to a medium size, and are remarkable for their solidity and long keeping qualities. This is the sort mostly grown for white sets, the small round hard bulb being ideal for the purpose. Sowings from seed produce good quality scallions, or a little later the small pickling size, and when fully mature a medium sized onion, unequalled for culinary purposes. A good plan is to sow seed thickly in the rows, and use the young seedlings as scallions, until sufficiently thinned out. Balance can then be left to produce bulbs of whatever size required. Pkt., 10 cts.; $\frac{1}{2}$ oz., 25 cts.; oz., 45 cts.; $\frac{1}{4}$ lb., \$1.25; lb., \$4.00.

Lyons Swiss Chard

169 An excellent and most useful vegetable, a row or two of which should be in every garden. This variety will quickly produce plants from which leaves may be cut all summer, as you can cut right down to the ground, and new shoots will soon spring up and make a fast growth. Those plants which are allowed to grow will make large crumpled and curly dark green leaves with thick white mid-ribs, which are delicious when cooked and served like asparagus, while the leafy parts make excellent "greens." Pkt., 10 cts.; oz., 25 cts.; $\frac{1}{2}$ lb., 50 cts.; lb., \$1.50.

Earliest Erfurt Kohl-Rabi

427 This turnip rooted member of the Cabbage family is far superior to turnips in both flavor and keeping qualities, and is ready long before even the earliest turnips. The above variety is the best of its class and equally good for forcing in hothed or greenhouse as well as for outdoor culture. Forms a very smooth root, nearly white, and is at its best when not more than 2 inches in diameter, being then very tender with the combined flavors of a Cabbage and a Turnip. Pkt., 10 cts.; $\frac{1}{2}$ oz., 20 cts.; oz., 30 cts.; $\frac{1}{4}$ lb., 85 cts.

Early Purple Vienna Kohl-Rabi

430 The skin of this variety is of rich purple color, but of course, the flesh is white, and in the opinion of many is of a more delicate taste than the green or white skinned sorts. Almost as early as the above, this is considered more heat resistant, hence recommended for sections where turnips turn bitter. Pkt., 10 cts.; $\frac{1}{2}$ oz., 20 cts.; oz., 30 cts.; $\frac{1}{4}$ lb., 85 cts.

Cocozelle Bush Squash

862 It has only been recently that scientists have discovered the presence of remarkable quantities of vitamins in summer squash, and doctors now prescribe an abundance of squash for children backward in physical development. One of the richest vitamin-bearers among summer squash is Cocozelle Bush, a handsome oblong dark green Italian variety liberally speckled with contrasting marks. Being of compact bush growth, a dozen plants will not take up any more room than a 15 foot row of bush beans and will provide from 2 to 3 dozen handsome fruits averaging 2 to 3 pounds each. This variety is unsurpassed in richness of the cooked product, which is of distinct aromatic flavor and aroma. Pkt., 10 cts.; oz., 20 cts.; $\frac{1}{4}$ lb., 60 cts.; lb., \$2.00.

California Wonder Pepper

711 This is a comparatively recent introduction and is fully entitled to space in this special section of our "Garden Book." The plants are sturdy and upright bearing six, seven or eight smooth, blocky fruits, which mostly reach immense size. The outstanding feature of the fruit, however, is the remarkable thickness of their sweet crisp fleshy walls, making them unequalled for stuffing or for salads, etc. They will keep for a long period after picking, too, and we are sure that Cal. Wonder will win the approval of all who see it. Pkt., 25 cts.; $\frac{1}{2}$ oz., 75 cts.; oz., \$1.25; $\frac{1}{4}$ lb., \$4.00.

"The President" Pea

702 Here is a new introduction of outstanding quality, and which, we are sure will be well received by our many customers. "The President" produces a vine 20 or 22 inches high, strong and vigorous, and rich dark green in color, bearing straight dark green pods in profusion which measure $4\frac{1}{2}$ to $4\frac{3}{4}$ inches in length, always well filled with sweet flavored Peas. Peas are ready for picking in about 68 or 70 days and therefore it is a most valuable sort to plant along with Laxtons Progress, which can be picked 7 or 8 days earlier. A trial pound or two will return a very profitable crop. Pkt., 15 cts.; $\frac{1}{2}$ lb., 30 cts.; 1 lb., 50 cts.; 2 lbs., 95 cts.; 5 lbs., \$2.15, prepaid.

Complete collections of Vegetable Seeds are offered on page 20

"THE PRESIDENT" PEAS

Dreer's Extra Early Tomato, Alpha

887 In the development of this strain we have kept in mind the importance of obtaining fruits free from the misshapen specimens which appear among the product of most plants of the extra early type. Alpha, we are glad to say, is an outstanding exception, the fruits coming very deep and smooth. Plants are distinct, with heavy wide foliage, and bear in abundance bright red fruits which ripen evenly right up to the stem, and which are solid and meaty. We anticipate that Alpha will soon supersede the Earliana strains for the favor of our customers, being in addition to its superior type, ready for picking in most localities slightly ahead of the latter. Pkt., 20 cts.; $\frac{1}{2}$ oz., \$1.00; 1 oz., \$1.75.

All Vegetable Seeds in quantities offered in this Catalogue are Delivered, Transportation Paid, anywhere in the United States, we reserving the privilege of shipping either by Parcel Post, Express or Freight

DREER'S COLLECTIONS OF CHOICE VEGETABLE SEEDS

These Collections are particularly helpful to those of our customers who are unable to decide on their own selection of varieties, and all the sorts used in their composition are of fine quality and thoroughly reliable, and include only standard vegetables, which go to make a complete and profitable garden. We offer three Collections of varying size and price which allow quite a saving, as the quantities offered here if bought separately would cost considerably more.

These Collections are packed ready for mailing and no alterations can be made.

DREER'S CELEBRATED LAWN GRASS SEEDS

OUR special brands of Lawn Grass Seeds are noted for their adaptability to various situations and soil conditions, and are now used in every section of the country for making private lawns, and also on the grounds of many leading Country Clubs, Athletic Clubs, Schools and Institutions, etc. These Mixtures have long enjoyed an enviable reputation for their general excellence, and it will always be our aim to maintain their high quality by the use of only the finest re-cleaned Grass Seeds, as free from all impurities as the most modern machinery can make them. **Quantity of Lawn Grass Seed to Sow.** One quart is sufficient for 200 square feet; 6 bushels for an acre, or for renovating an old lawn use one-half these quantities.

The "Dreer" Lawn Grass

This is by far the best mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is prepared from our own formula, and is a careful blending of varieties adapted to producing the thick growth and velvety appearance so much sought after. Each variety of grass in its composition is there for a special purpose; some for making strong fibrous roots, which take hold upon the soil and keep the turf in place, others of a creeping nature quickly fill up any bare spots which may be caused by the taller sorts dying down; varieties which are useful for their color value, and also kinds that are able to withstand the beating down of excessive rains.

Whether you want to seed a small grass plot in your yard, or a lawn of more pretentious size, you should use this grass mixture. For the convenience of customers, we put this seed up in various-sized packages, from the single pint, which is sufficient to cover 100 square feet of ground, to such quantities as are required for seeding large lawns where six bushels of seed to the acre are required. Per pt., 30 cts.; per qt., 50 cts.; 4 qts., \$1.50; peck, \$2.75, prepaid. By express or freight at purchaser's expense, $\frac{1}{2}$ Bushel (10 lbs.), \$5.00; bushel (20 lbs.), \$10.00; 100 lbs., \$47.50.

Dreer's "Evergreen" Lawn Grass

This special mixture produces beautiful and permanent lawns. It is made from our own formula, and composed of grasses which are adapted for the purpose of producing turf which retains its rich green color and velvety appearance throughout the entire summer and fall. In making up this brand we are careful to use only seed that has been thoroughly re-cleaned. Per pt., 25 cts.; per qt., 40 cts.; 4 qts., \$1.25; peck, \$2.25, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$4.00; bushel (20 lbs.), \$8.00; 100 lbs., \$37.50.

Dreer's "Fairmount Park" Lawn Grass

This popular, low priced mixture is well suited for various soil conditions, giving good results even in small city grass plots, where the soil is generally stiff and heavy. It will form a thick turf in a very short time and is well suited for lawns and other spaces having considerable hard wear. It is also valuable for use on embankments and terraces; also for renovating old, worn-out lawns. Per pt., 20 cts.; per qt., 35 cts.; 4 qts., \$1.00; peck, \$1.90, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$3.50; bushel (20 lbs.), \$7.00; 100 lbs., \$32.50.

Dreer's "Golf Links" Grass

Prepared from a special formula, with the object of producing a thick turf that will stand the hard usage suffered by the average Fairway. For the Golf Course, Teeing Ground, Football and Polo Fields and other Athletic Grounds, or for the Lawn which has to withstand hard wear, this mixture will give perfect satisfaction. Per pt., 25 cts.; per qt., 40 cts.; 4 qts., \$1.25; peck, \$2.25, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$4.00; bushel (20 lbs.), \$8.00; 100 lbs., \$37.50.

Dreer's "Putting Green" Mixture

A careful study of the requirements for making the most substantial turf for Putting Greens developed the mixture herewith offered by us for this purpose. The varieties comprising it are all of the fine-bladed, low-growing and most hardy kinds, and maintain their rich, green color throughout the season. For Tennis Courts, Cricket Tables, and wherever a billiard table smoothness is necessary, this superfine mixture will give the desired result. Per pt., 45 cts.; per qt., 80 cts.; 4 qts., \$2.50; peck, \$4.75, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (12 $\frac{1}{2}$ lbs.), \$9.00; bushel (25 lbs.), \$18.00; 100 lbs., \$70.00.

Dreer's "Shady Place" Grass

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places. For sowing in such places we recommend the use of this special mixture. It will quickly produce an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted for growing in shade, and as it blends well with our regular Lawn Grass Mixture, it may be used on those portions of the lawn which are shaded by trees, buildings, etc., thus covering the whole area with a rich green sward. In spring give a light reseeding, then a top dressing of finely screened soil or sand, together with Bone Meal. This will repair the damage done by the winter rains. Per pt., 30 cts.; per qt., 50 cts.; 4 qts., \$1.50; peck, \$2.75, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$5.00; bushel (20 lbs.), \$10.00; 100 lbs., \$47.50.

"Seashore" Lawn Grass

A rich, green lawn is especially desirable at the seashore, but unless the right mixture of grasses and clover are used the result will be disappointing. Our Seashore Lawn Grass is composed of strong-rooted varieties which quickly produce a good turf. In preparing the land it should first be top-dressed with about four inches of good soil, as grass will not grow well in sand, but the seeds will quickly germinate in the top-soil and make strong roots, which reach down into the sand for moisture. In order to keep the seaside lawn in good condition it should be watered liberally every evening, and also have an occasional application of our sterilized Sheep Manure in order to keep up a vigorous growth. Per pt., 30 cts.; per qt., 50 cts.; 4 qts., \$1.50; peck, \$2.75, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$5.00; bushel (20 lbs.), \$10.00; 100 lbs., \$47.50.

"Southern" Lawn Grass

It has heretofore, always been a difficult task, in tropical and semi-tropical climates, to keep the lawn attractive, but we can recommend this special mixture of Grass Seeds, peculiarly adapted by maturing at different seasons, for providing an all the year round green lawn in Southern States, subjected as they are to long hot summers. With this seed and given the usual attention in the way of watering and fertilizing, an excellent lawn may be maintained. Per pt., 30 cts.; per qt., 50 cts.; 4 qts., \$1.50; peck, \$2.75, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$5.00; bushel (20 lbs.), \$10.00; 100 lbs., \$47.50.

Dreer's "Terrace" Lawn Grass

Ordinary lawn grass will not hold the soil on terraces and embankments, which require a thick turf, composed of varieties which make strong roots to take hold of the soil and prevent washing by heavy rains. Our Terrace Grass is a carefully prepared combination of such grasses as will fill the requirements by making a quick growth of grass which will form a strong mat and present a good appearance. It will grow well anywhere, but it is best to enrich the soil with our sterilized Sheep Manure, or with Bone Meal, in order to provide nourishment to the young roots and give a vigorous start to their growth. Per pt., 30 cts.; per qt., 50 cts.; 4 qts., \$1.50; peck, \$2.75, prepaid. By express or freight, at purchaser's expense, $\frac{1}{2}$ bushel (10 lbs.), \$5.00; bushel (20 lbs.), \$10.00; 100 lbs., \$47.50.

White Dutch Clover Seed

Excellent for use on lawns; forms a close very dwarf herbage and remains green throughout the season, and it is particularly suited to seashore lawns where it is difficult to secure a good stand of grass on the light sandy soils. We furnish the choicest grade of re-cleaned seed. Oz., 10 cts.; $\frac{1}{2}$ lb., 30 cts.; $\frac{1}{4}$ lb., 50 cts.; lb., 95 cts., postpaid. By express or freight, at purchaser's expense, lb., 85 cts.; 5 lbs., \$4.00; 10 lbs., \$7.75; bushel (60 lbs.), \$45.00; 100 lbs., \$75.00.

DREER'S TEN GREAT DAHLIAS

Ten distinct varieties offered below which we have singled out from among the Decorative and Cactus types as worthy of every Dahlia fancier's special attention. While some of these are recent introductions the majority are varieties which have stood out most prominently for several years as the most desirable for either garden decoration or for cutting for house decoration and which prominent position they still hold.

All of the varieties listed under this heading will be supplied in dormant field roots of proper planting size.

THE "DREER DOZEN"

Hardy Everblooming Hybrid-Tea Roses

For many years it has been customary for us to offer under this heading only the very best and most popular, well-tried varieties of Hybrid-Tea Roses, with the majority of which every lover of the Rose is familiar.

We recommend this collection for general planting to the amateur who wishes a limited number of varieties, and who is desirous of a supply of extra choice flowers to cut throughout the season. Those who desire a more extensive collection can select with perfect confidence any variety in our collection of Hybrid-Tea Roses. There is not one individual sort which we cannot endorse as possessing superior merit, all having been thoroughly tested.

Duchess of Wellington. Long shapely buds, with petals of great substance, color an intense saffron-yellow stained deep crimson, delightfully fragrant and very free flowering.

Hadley. One of the best high colored varieties, an intense, rich, dazzling, crimson-scarlet shading to velvety crimson, deliciously fragrant. The plant is of vigorous growth, and is particularly fine in the autumn.

Imperial Potentate. The beautifully-shaped long buds develop into large double sweet-scented flowers of glistening rose-pink with silvery suffusion at base of petals. Growth vigorous, upright and very free flowering.

Los Angeles. One of the most beautiful Roses yet introduced. The long-stemmed flowers are of a luminous flame-pink, toned with coral, and shaded with translucent gold at the base of the petals. The buds are long and pointed and expand to flowers of large proportion, of absolutely perfect form and of rich fragrance.

Mme. Edouard Herriot (The Daily Mail Rose). In color its buds are coral-red, shaded with yellow at the base, the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rosy-scarlet passing to shrimp-red. A wonderful color combination.

Mme. Jules Bouche. While not a pure white, it being at times slightly tinted with blush at the centre, it is to all intents white and without question the best white everblooming bedding Rose yet introduced. The flowers are large, quite double and of splendid form, both in the bud as well as in the fully expanded flower; it is fragrant, a vigorous grower and very free flowering.

Mrs. William C. Egan. An extremely vigorous strong healthy grower, with long, pointed buds of absolutely perfect form, that develop into flowers of good shape. In color it is a two-tone pink, the reverse of the petals a soft light pink, the interior deep flesh color with a golden line at the base of the petals; the flowers are carried on long stiff stems, and last in good condition for an unusually long time, either cut or on the plant; an exceptionally free and continuous bloomer.

HYBRID-TEA ROSE, SOUV. DE GEORGES PERNET

Padre. Long buds of rich brilliant coppery-scarlet, flushed with golden yellow at base; while the fully developed flowers are only semi-double, they are of unusual formation and attractive in all stages of development. A splendid free-flowering bedding rose that is admired by everyone.

Radiance. An ideal bedding Rose of American origin that continues to produce its large fragrant flowers throughout the most unfavorable hot summer weather when frequently many other varieties fail; in color a brilliant carmine-pink, with salmon-pink and yellow shadings at the base of the petals; truly a Rose for every garden.

Red Radiance. A counterpart of Radiance from which it is a "sport," possessing all the good traits of that valuable variety but differing in color which is a bright cerise-red.

Souvenir de Claudius Pernet. A most vigorous grower of erect branching habit, beautiful, brilliant green foliage, long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full flowers with elongated deep petals, a beautifully formed bloom. Color, striking sunflower-yellow, deeper in the centre, without any color blending, and which is retained without fading even in the warmest weather.

Souvenir de Georges Pernet. Unequaled in color by any other variety; its long pointed buds of rich oriental-red tipped with carmine and suffused with a rich golden sheen expand to full double flowers of elegant form. Strong vigorous growing and profuse in flowering.

PRICE. Any of the above in strong two-year-old plants, \$1.00 each; \$11.00 per doz.; \$90.00 per 100.
One each of the "Dreer Dozen," a fine collection, for \$11.00.

The Dreer "Gold Medal Dozen" New Hardy Everblooming Hybrid-Tea Roses

NEW HYBRID-TEA ROSE JOHN RUSSELL

John Russell. A handsome brilliant red Rose; a rich deep velvety crimson of very large exhibition type, beautiful both in bud as well as in the fully expanded very double flowers. Strong vigorous grower, delicately sweet scented. \$1.50 each.

Lady Margaret Stewart. A Rose of unique color, the flowers in the young stage are a deep sunflower yellow heavily veined splashed with orange-scarlet, reverse of the petals deeply suffused with carmine, as the flowers develop these colors intermingle forming a beautiful cadmium orange effect. The bud is long and pointed, opening to a full double flower, of pleasing decorative form of delightfully sweet scent. \$2.00 each.

Margaret McGredy. We consider this a masterpiece of McGredy & Sons. Large brilliantly-colored double flowers of an entrancing shade of rich Oriental red, passing to carmine-rose, lasting a long time. The plant is of vigorous bushy habit, very free flowering; light spicy fragrance. \$2.00 each.

Mrs. A. R. Barraclough. One of the finest Roses yet introduced. We have in this variety a most distinct and valuable addition, of a bright but soft sparkling carmine-pink of even tone that passes to yellow at the base of the petals; this attractive color does not fade as the flower ages, but if anything becomes richer and brighter. The bud is long pointed and develops into a full double flower of model form and substance; very fragrant. \$2.00 each.

Mrs. Henry Bowles. One of the best bedding varieties grown, always in flower and perfect in every stage of development. In color it is of an intense brilliant pink with lighter salmon pink shadings. A model rose in every way. \$1.50 each.

We will supply one strong two-year-old plant of the above Gold Medal Collection of New Varieties amounting at single rates to \$19.50; the set of twelve for \$15.00.

The wonderful advance made during recent years in this popular type of Rose is well exemplified in this collection of twelve varieties of outstanding merit of recent introduction, and we especially recommend this Gold Medal Dozen as a desirable up-to-date addition to the thousands of our patrons who now have the Dreer Dozen growing in their gardens.

Dame Edith Helen. Perfect buds developing into wonderful flowers of immense size are produced singly on well-foliaged strong canes freely throughout the season. The flowers are composed of very substantial broad petals which curl back prettily forming a glorious long pointed bud and a full double flower which is beautiful in every stage of development. GLADIOLUS, GOLD MEDAL HYBRIDS

GLADIOLUS in Mixture

Our mixtures offered below are made up of fine varieties, not the common sorts, which produce themselves so freely, and are all **strictly selected first size bulbs**, and sure to give satisfactory results.

Gold Medal Gladiolus

We grow this magnificent strain for the express purpose of being able to supply many of our customers who want something decidedly better than the usual run of mixtures and who do not care for the named sorts. When Gladiolus are grown in mixture they are liable to deteriorate, and finally contain only a few colors. To avoid this we grow small blocks of a large number of exquisite colors, many of them high-priced sorts, from which these mixtures are made, which insures results which cannot be had in any other way, and if you wish something really extra fine, these are sure to please you.

Gold Medal Section No. 1. This contains all the scarlet, blood-red, garnet, amaranth, and similar rich shades of color in great diversity. 7 cts. each; 75 cts. per doz.; \$5.50 per 100.

Gold Medal Section No. 2. This is composed of the white, yellow, and delicate shades of pink, rose, etc., and is especially valuable for cutting. 7 cts. each; 75 cts. per doz.; \$5.50 per 100.

Gold Medal Section No. 3. In this section are included the blue, heliotrope, lilac, mauve and similar tints. A lady customer, on seeing a bunch of these, called them "pansy colors," which aptly describes them. 10 cts. each; \$1.00 per doz.; \$7.50 per 100.

Gold Medal Mixture. This contains some each of the above sections, a wonderful diversity in color; by far the finest mixture of Gladioli ever offered. 6 cts. each; 65 cts. per doz.; \$5.00 per 100; \$45.00 per 1000.

Primulinus Hybrids Mixed

This mixture is certain to produce some beautiful flowers mostly in tones running from light yellow to orange, apricot and crimson; for description of this type see page 27. 50 cts. per doz.; \$3.00 per 100; \$28.00 per 1000.

DREER'S CHOICE GARDEN CHRYSANTHEMUMS

These are universally popular for outdoor bedding, and considering their many good qualities, there is no cause for surprise to see them cultivated so extensively. They produce a lavish profusion of blooms, giving color, life and beauty to the garden just at a time when other plants have been destroyed by frost and are looking their worst. Frost does not materially affect the flowering, and it frequently happens that an armful of flowers can be cut late in November. They are reasonably hardy if planted in a well-drained position, with a covering of leaves or loose litter during the winter, or may be carried over with perfect safety in a cold frame.

The various collections offered below have been selected from hundreds of varieties that we have tested, and represent the very best in their respective class and color.
